EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Paul Ragusa on April 28, 2007.

The application has been amended as follows:

- Please amend claims 1 and 2 as follow:

1. A connector comprising a housing and a required number of pusher members, said housing including a fitting aperture into which at least three flexible printed circuit boards are inserted, said housing further including an insertion opening for holding said required number of pusher members so that when said flexible printed circuit boards are inserted into said fitting aperture of said housing, contact portions of said at least three flexible printed circuit boards are urged by two cantilever arms of said pusher members so as to be connected to each other to achieve electrical continuity of the connector, wherein said pusher members have substantially a U-shape and are formed of a unitary part and said pusher members each comprise pushing portions extending towards the flexible printed circuit boards[.];

wherein the pusher members are entirely enclosed within the housing.

2. A connector comprising a housing and a required number of pusher members, said housing including a fitting aperture into which two flexible printed circuit boards are inserted, said housing further including insertion openings for holding said required number of pusher members so that when said flexible printed circuit boards are inserted into said fitting aperture of said housing, contact portions of said two flexible printed circuit boards are urged by two cantilever arms of said pusher members so as to be connected to each other to achieve electrical continuity of the connector, wherein said pusher members have substantially a U-shape and are formed of a unitary part and said pusher members each comprise pushing portions extending towards the flexible printed circuit boards[.];

wherein the pusher members are entirely enclosed within the housing.

2. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach the pusher members are entirely enclosed within the housing.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
